

Project Executable Files

Date	5 July 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for the project. All files are organized, named, and uploaded to the specified submission platform. The evaluator can run or deploy the solution locally, or access it directly via the live deployed URLs below.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema (SQLAlchemy models)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results (86 backend tests)	Yes
10	Demo video or walkthrough (if required)	[FILL IN once recorded]

Step 2: File / Folder Structure

Overview of the project's file and folder structure:

```
AI_Powered_Debt_Relief_And_Financial_Recovery_Platform/
|
|-- backend/
|   |-- app/
|       |-- main.py
|       |-- database.py
|       |-- models.py
|       |-- schemas.py
```

```

| | | |-- auth.py
| | | |-- routers/
| | | | |-- users.py
| | | | |-- loans.py
| | | | |-- settlement.py
| | | | `-- dashboard.py
| | | `-- services/
| | | | |-- financial_engine.py
| | | | |-- settlement.py
| | | | `-- ai_engine.py
| | `-- requirements.txt
|
|-- frontend/
| | |-- src/
| | | |-- api/client.js
| | | |-- components/
| | | `-- pages/
| | |-- package.json
| | `-- vite.config.js
|
|-- Project_Files/
| | |-- 01_Pre-requisites/
| | |-- 02_Project_Flow/
| | |-- 03_ER_Diagram/
| | `-- ... (Epic folders 04-10)
|
|-- README.md
`-- .gitignore

```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Frontend (live app): https://ai-powered-debt-relief-and-financia-three.vercel.app Backend API: https://ai-powered-debt-relief-and-financial.onrender.com
Login Credentials (Demo)	No pre-seeded demo account exists; the evaluator should register a new account via the app's Register tab, then log in with those credentials.
Platform / Hosting Provider	Backend hosted on Render (Python 3.11.9, Uvicorn/FastAPI). Frontend hosted on Vercel (Vite/React build).
Repository Link	https://github.com/smd1807/AI_Powered_Debt_Relief_And_Financial_Recovery_Platform
Demo Video Link	[FILL IN once recorded]

Step 4: Run Instructions (Local Setup)

Pre-requisites: Python 3.11+, Node.js 18+ and npm 9+, Git, SQLite (comes with Python), Google Gemini API Key

Step 1: Clone the repository: `git clone`

`https://github.com/smd1807/AI\_Powered\_Debt\_Relief\_And\_Financial\_Recovery\_Platform.git`

Step 2: Navigate to the project directory: `cd AI_Powered_Debt_Relief_And_Financial_Recovery_Platform`

Step 3: Backend setup: `cd backend`, then `pip install -r requirements.txt`, then `uvicorn app.main:app --reload --host 0.0.0.0 --port 8000`

Step 4: Frontend setup: `cd frontend`, then `npm install`, then `npm run dev`

Step 5: Open your browser and visit: <http://localhost:5173>

Step 6: Register a new account from the Register tab, then log in.

Step 7: Explore the dashboard, add loans, analyze financial health, predict settlements, and generate AI negotiation letters.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI responses depend on Google Gemini API availability	Rule-based fallback engine activates automatically if the API is unavailable
2	Settlement predictions are based on rule-based financial thresholds and may vary	Use as a financial guidance tool, not as a guaranteed result
3	Backend runs on Render's free tier, which may briefly sleep after inactivity	First request after idle may take a few extra seconds to respond
