

Data Flow Diagram

Date	5 July 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
OVAL	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Google Gemini API).
BOX-1	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Login, Calculate Financial Health).
FILLBOX	Data Store	A place where data is held for later use (e.g., Users table, Loans table).
ARROW	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Diagram — FinRelief AI Data Flow

The diagram below illustrates how data moves through the FinRelief AI platform, from the borrower through authentication, loan and financial processing, to AI-powered settlement and negotiation, and finally into the database and back to the borrower.
