

Demonstration of Proposed Features

Date	5 July 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase (organized as 6 Epics) and tracks whether each was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S. No	Feature Name	Description	Status (Implemented/Partial/Pending)	Demonstrated (Yes/No)	Remarks
1	Epic 1: Application Setup	Configured Python 3.11+, FastAPI, React.js (Vite), SQLite, SQLAlchemy, and JWT authentication.	Implemented	Yes	Backend/frontend scaffolding complete and structured.
2	Epic 2: AI Integration & Financial Engine	Implemented financial health calculations (DTI, EMI, surplus, stress level), settlement prediction, and Gemini AI negotiation, with rule-based fallback.	Implemented	Yes	Gemini API integrated successfully with fallback tested.
3	Epic 3: Database Management	Implemented SQLAlchemy models for Users, Loans, Financial Profiles, Settlement Records, and AI History with indexed foreign keys.	Implemented	Yes	SQLite database with SQLAlchemy ORM implemented.
4	Epic 4: Frontend Integration & UI Development	Created responsive UI with login/registration, dashboard, loan management, settlement predictor, and AI negotiation pages.	Implemented	Yes	All pages designed and functional; mobile-responsive nav added.
5	Epic 5: Testing & Optimization	Performed input validation, error handling, JWT session fixes, and 86 backend automated tests.	Implemented	Yes	All 86 backend tests passing.
6	Epic 6: Version Control & Deployment	GitHub repository setup, folder organization, and live deployment on Render (backend) and Vercel (frontend).	Implemented	Yes	Application is live and publicly accessible.

Feature Implementation Summary:

Total Epics Proposed	6
Total Epics Implemented	6
Total Epics Demonstrated	6
Overall Implementation Rate (%)	100%
